Welcoming words

Il y a du possible encore invisible dans le réel...
Edgar Morin

The Transiro Collective is proud to engage in a process of social, ecological and creative transition, fueled by the setting-up of recurring events, which will link the local to the global from 2018 to 2020. This process will highlight and network a multitude of inspiring and concrete transition initiatives through the construction of spaces, of immersive, festive, eco-responsible villages rooted in local communities, as well as in various international networks.

This summer 2018, the ball was launched, with a mobilization path punctuated by festive evenings (the Night of Possibilities and the Workshop of Possibilities) that lead us to the event "Possible Village" which will be from August 10th to 11th 2018 in Montreal. Thus, we invite you to read this program which will act as a guide for the next two days. We hope you find all the information you need to enrich your experience.

Good "Possible Village"!

In solidarity,

The Transiro Collective.

Transiro's Process

The context

Faced with the current systemic crisis, thousands of people across Quebec and around the world are working every day towards a profound transition for more just, supportive and sustainable societies. A movement is underway that reinvents our ways of producing, exchanging, of living in our towns and villages, of being in touch with nature and each other, of feeding us, of moving about or even of how to educate our children. A whole set of initiatives, networks and events are emerging all around the planet, demonstrating that the world we want to live in already exists, in germ: it's up to us to cultivate it!

The event in Montreal

During the event that will take place in Montreal in August 2018 as well as in the world, thanks to online tools, everyone will be invited to meet and become actresses and actors of the transition. The "Village Possible" will allow the exchange of knowledge and practices through the presentation of numerous workshops, conferences, demonstrations, convergence activities

...

All taking place in a festive family atmosphere with concerts and other participatory shows. Deconstructing the boundaries between actors and viewers, this event will allow all those who participate to (re)appropriate the public space, to share the transition initiatives that already exist and to create new ones. Going towards a more just, more inclusive and more ecological society is possible, it is a process accessible to all!

The collective and its values

We are a diverse and committed Collective, looking for decentralization and horizontality, wishing to welcome all the people interested by this process and, together, to move forward on the path of social and ecological transition by implementing inspiring and transformative initiatives. Beyond an event, Transiro is also a process of continuous organization and commitment, driven by fundamental values, such as equality, kindness, openness, generosity, transparency, autonomy, eco-responsibility... necessary to achieve profound and positive change.

They make it go from a tonic state to a relaxed state and vice versa. To experience this passage, will be the goal of this workshop.
